

# GO Regulator Continuous Supply Switching Systems

## GO COM-2P

## GO COM-2B

## ENSURING CONTINUOUS AND PREDICTABLE GAS SUPPLY

### HIGH-QUALITY

Every switching changeover regulator system is constructed of high-quality materials and suitable for each specific application.

### HIGH-PERFORMANCE

Every regulator product has been field tested and proven for effectiveness, safety, environmental, and reliable performance.

### SEAMLESS SUPPORT

Our precision products, selection, and ongoing support expertise keep your operations performing at their best.

## Highly Sensitive Pressure Regulators for Just About Every Need!

### GO COM-2P Crossover

- Two single-stage regulators
- Single easy-to-mount body
- Primary/secondary regulators with common outlet port
- Allows non-stop gas delivery and eliminates analyzer upsets
- +/-0.01% pressure variance
- Inlet pressures to 6000 psig
- Outlet pressures 0-250 psig
- Crossover pressures 10-250 psig
- 1/4" FNPT connections and reducers
- Stainless steel, brass, MONEL, and INCONEL diaphragm options
- Seat materials

### GO COM-2B Changeover

- Smaller compact design
- Two single-stage regulators
- Single line regulator for supply
- Ensures no pressure change during source depletion
- Easy manual adjustment as needed
- For cylinder change during operation
- Stainless steel, brass, and MONEL
- +/-0.01% pressure accuracy
- Changeover pressures 10-250 psig
- Cv coefficients: 0.025, 0.06, 0.2, 0.5
- 20 micron inlet filters
- PTFE-lined INCONEL diaphragm
- Seat materials
- Inlet pressures to 6000psi

### Ensuring Performance

- Local inventory and immediate swap
- Maximize reliability in all applications
- Supporting up to 6-pack of bottles
- Modular designs for multiple panel configurations
- Tailored to desired supply flow rate, system compatibility, and all requirements
- Maximize gas usage and minimize single cylinder or 6-pack bottles
- Cost-effective options for just about every budget
- Local, on-site support always available
